+6281995247372 | Andychensaputra@gmail.com | www.linkedin.com/in/andy-saputra-586b22247
andylabs.site | Jakarta Barat

Computer Science student focused on **Full-Stack Development** with hands-on internship experience building web applications across **frontend, backend, APIs, and databases**. Strong foundation in software development with experience across multiple languages and frameworks. Comfortable translating requirements into **functional, maintainable, and user-focused solutions**. plus additional exposure to **AI, machine learning, deep learning, and LLM integration**.

EDUCATION

Binus University - Alam Sutera

July 2023 - February 2027 (Expected)

Bachelor's Degree in Informatics Engineering — System Intelligence

GPA: **3.77/4.00**

- **Thesis:** *Multi-Agent System with Hybrid Approach (NLU, Fuzzy Logic, and LLM) for Social Engineering Simulation in "Silent Terror" Strategy Game*
- **Relevant Coursework:** Software Engineering, Object-Oriented Programming, Data Structure, and Algorithm Programming, Deep Learning, Machine Learning, Natural Language Processing.
- **Leadership & Activities:** Advisor and Former activist in Binus TV CLUB, Former Freshman Leader.

SMAS Pelita Utama (Science)- Batam

July 2020 - April 2023

- **Activities:** Led as the president of the Student Representative Council (MPK), and led major events as project director in the school's main event.

PROFESIONAL EXPERIENCE

POLYTRON - Application Developer intern

Node.js | Express.js | SQL | API | Docker | LLM

February 2026 – January 2027

Contributed to the development and maintenance of internal web applications supporting employee services and operational processes.

- Developed **full-stack features** across frontend, backend, APIs, and database layers, including authentication, session management, responsive interfaces, and real-time notifications to support internal workflows.
- Integrated **AI capabilities, including NLP and LLM integration**, while supporting Docker-based development environments to improve application functionality, maintainability, and deployment consistency.

Qreed AI — Full-Stack Developer

Express.js | React.js | Next.js | Sentry | Docker

September 2026 - recent

Develop and maintain Qreed AI as a freelance full-stack developer, translating client requirements into production-ready features and ongoing application improvements.

- Developed **full-stack features and application pages** across frontend, backend, and APIs using React/Next.js and Node.js/Express, translating business requirements into maintainable and scalable functionality.
- Implemented **application monitoring and issue tracking** while working with Docker-based environments to improve debugging, development consistency, and long-term maintainability.

SELECTED PROJECT - More at andylabs.site

Silent Terror - Thesis Project

Angular | Python | SQL | Docker | SVM | Fuzzy Logic | LLM

<https://github.com/Andysaputra1/GamesSilentTerror>

Engineered a hybrid AI architecture for a "silent terror" environment by integrating **ML/DL** models (SVM, Naive Bayes, Transformer LLMs) and decision frameworks (**Fuzzy Logic, Utility AI, Behavior Trees**), significantly amplifying psychological suspense and **delivering an immersive player experience**.

My Invitation — Personal Project

Node.js

<https://www.myinvitation.cards>

Developed a **digital wedding-invitation platform** with themed collections, package previews, and consultation flows focused on responsive and elegant presentation. The platform provides users with a centralized way to explore invitation options and initiate event consultations.

Reservasi ID — Personal Project

React.js | SQL

<https://reservasi-id.andylabs.site>

Developed a **web-based ferry ticket platform** using React and SQL to centralize route, schedule, and booking information. The platform simplifies the process of finding ferry options and connecting passengers with official ticket agents.

AI Trainer — Personal Project

Python | TensorFlow/Keras | MediaPipe Pose | FastAPI | React

<https://github.com/Andysaputra1/deeplearning>

Developed an **exercise-quality assessment system** using pose-derived features and autoencoder reconstruction error to evaluate push-ups, pull-ups, squats, and planks. The system provides quality scores and a foundation for AI-assisted exercise evaluation through a FastAPI and React architecture.

SkolioCheck — University Project

Python/Flask | TensorFlow/Keras | VGG16

<https://github.com/Andysaputra1/Scoliovis>

Developed a **VGG16-based deep learning prototype** for scoliosis classification from X-ray images with preprocessing and Flask-based inference. The application processes uploaded X-rays and returns a preliminary Normal or Scoliosis classification.

PERSONAL EXPERIENCE

Freshmen Leader — Alam Sutera

August 2025 – September 2025

Guided first-year students in adapting to university life, **mentoring** them through Binusian values, academic transition, and campus engagement to build confidence, connection, and motivation.

BINUS TV Club - Alam Sutera

August 2023 - December 2025

Former core member and Technical Advisor, providing technical direction, cross-functional coordination, and end-to-end post-production support for large-scale student initiatives.

Technical Advisor - Core Development (PSA, Media Journey, Glimpse of BINUSTV Club, Buram EXPO, LDKA)

- Mentored new members in technical best practices and supported project execution through hands-on guidance and feedback to ensure quality results.

Technical Coordinator

(Buram Expo)

- Managed technical setup and on-site issue resolution across divisions to ensure optimal performance and smooth event operations.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, C

Frontend & Backend: HTML, CSS, React.js, Angular, Node.js, Express.js, FastAPI, Flask

Database, APIs & Tools: MySQL, SQL, RESTful APIs, Docker, Git

Artificial Intelligence: Machine Learning, Deep Learning, NLP, LLM Integration, OpenAI API, Prompt Engineering

ADDITIONAL INFORMATION

Soft Skills: Strong **leadership, teamwork, and communication** skills, with an adaptable and solution-oriented approach to problem-solving and time management.

Achievement: 2nd Place — SIM Business Plan Competition, Batam (2022)

Languages: Indonesian, English, Mandarin (Basic), Teochew
